

Hundred Chart Games

Skip Counting

The chart is a great visual for skip counting by 2's 5's and 10's.

Fill In

White out or cover some numbers and allow your child to write the missing number on a separate piece of paper.

Patterns

Find and locate patterns in the numbers (such as all the twenties start with a 2 and all the forties start with a 4).

Before / After / Between

Give your child a 'magic' number(s) and have them identify the number(s) that comes before, after, or between the given numbers.

More / Less

Give your child a 'magic' number and have them identify the number that is 1 or 2 more and 1 or 2 less.

Writing Numbers

Say a number aloud and have your child write the number in rice, play dough, soap, paper, cooked noodles, etc.
